

Yuto Brown

Software Engineer

✉ seimoroiyoto@gmail.com 🔗 yutobrown.vercel.app

PROFILE

AI-driven Full Stack Developer with 5+ years of experience building scalable, production-grade web applications and intelligent systems. Specializing in modern frontend and backend technologies including React, Vue.js, Node.js (NestJS), and GraphQL, with strong backend expertise in PHP (Laravel) and Python.

Experienced in integrating large language models (LLMs) and AI-powered workflows into real-world applications, including prompt design, API orchestration, and building automation pipelines using OpenAI and similar platforms. Focused on delivering AI-enhanced user experiences such as intelligent search, content generation, and workflow automation.

Strong background in system design, performance optimization, and secure application architecture, including authentication and authorization (JWT, OAuth). Hands-on experience integrating payment systems such as Stripe and PayPal.

Proficient in designing and scaling backend systems with PostgreSQL, MongoDB, and RESTful APIs, as well as deploying cloud-native applications on AWS (EC2, Load Balancer) and GCP.

Skilled in modern development practices including automated testing (Jest, Cypress), CI/CD, and remote collaboration. Adept at translating complex business requirements into scalable, AI-powered solutions, working effectively across cross-functional teams to deliver high-impact, user-centric products.

PROFESSIONAL EXPERIENCE

Mercari 🔗, Full Stack Developer

04/2021 – 12/2022 | Remote

- Developed and maintained scalable web applications using React, TypeScript, Node.js, and PostgreSQL.
- Built internal admin dashboards and API integrations that improved operational efficiency for distributed teams.
- Collaborated with UI/UX designers and backend engineers in an Agile remote environment.
- Improved application performance and reduced API response times through database optimization and caching strategies.
- Participated in CI/CD pipeline improvements using Docker and GitHub Actions.

SmartNews 🔗, Senior Full Stack Engineer

01/2023 – 08/2024 | Remote

- Led full stack development for content management and analytics platforms serving high-traffic users.
- Designed RESTful APIs and microservices using Python, FastAPI, and AWS cloud infrastructure.
- Developed responsive frontend interfaces with Next.js and Tailwind CSS.
- Worked closely with cross-functional teams to deliver new features in rapid release cycles.
- Implemented automated testing and monitoring systems to improve service reliability and maintainability.

Wantedly, Inc., AI-Driven Full Stack Developer

09/2024 – 10/2025 | Remote

- Developed AI-integrated web applications utilizing OpenAI APIs and LLM-based workflow automation.
- Built modern SaaS platforms using React, Next.js, Go, and Supabase.
- Integrated authentication, payment systems, and real-time collaboration features.
- Optimized frontend rendering and backend scalability for improved user experience.
- Contributed to technical architecture decisions and mentored junior developers in remote collaboration environments.

EDUCATION

Osaka University, *Bachelor of Computer Science*
04/2017 – 03/2021 | Osaka, Japan

LANGUAGES

English | Japanese

SKILLS

Core Languages

- JavaScript / TypeScript
- Python
- C#
- C / C++
- Java
- Ruby
- Rust

DataBase

- MySQL
- Oracle
- PostgreSQL
- MongoDB

Backend

- Node.js
- NestJS
- PHP(Laravel)
- Python
- GraphQL
- RESTful API
- PostgreSQL
- MongoDB

Tools /Infrastructure

- AWS
- GCP
- Docker
- Jest
- Cypress
- Mocha/chai
- OAuth
- Websocket
- Git
- CI/CD
- Blockchain
- Solidity
- Solana

Fronted

- React
- Next.js
- Vue.js
- HTML5
- CSS3
- JavaScript
- Tailwind CSS
- Styled -components
- MUI
- SCSS
